I think that was me and that was based on what I heard from Dic Gribbon, from Puget Sound Clean Air Agency. He is (b) (6), otherwise I'd call him up and ask him. I know Dic was very familiar with the site and PSCA probably has records on his investigations. I'm guessing you want to know the probability of running into asbestos during container removal. My recommendation is to contact PSCA and have them do a records search for you. My information is only second hand and old. Hope this helps.

Subject: Pillon site question

Hello, Cynthia. I met you at the Pillon trial and then later at Scott Marlow's office.

I think someone told me there was asbestos waste in a grove of trees on the Pillon site. I could be wrong , but was that you?
